

Longitudinal summary of the course evaluation for Experimental microsurgery

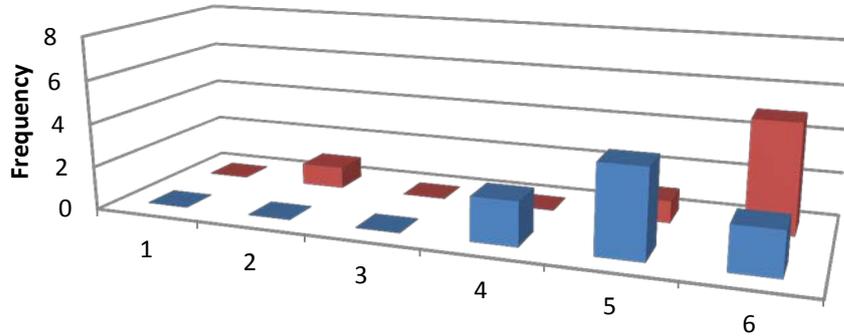

Numeric scale 1-6, 6 is highest score.

9 out of 9 participants answered the anonymous evaluation

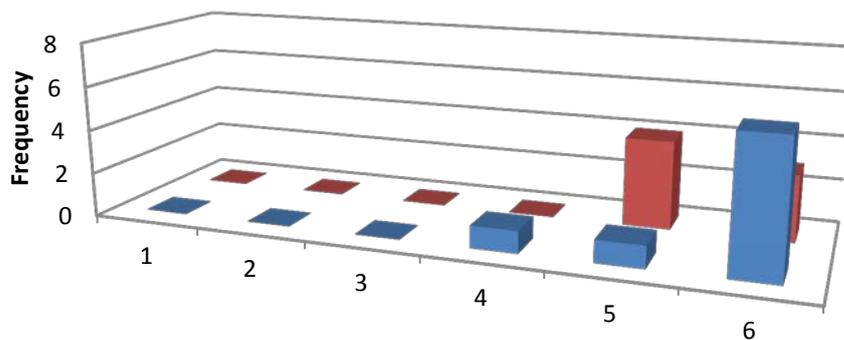

- Autum 2014
- Spring 2014
- Autum 2013
- Spring 2013

GENERAL

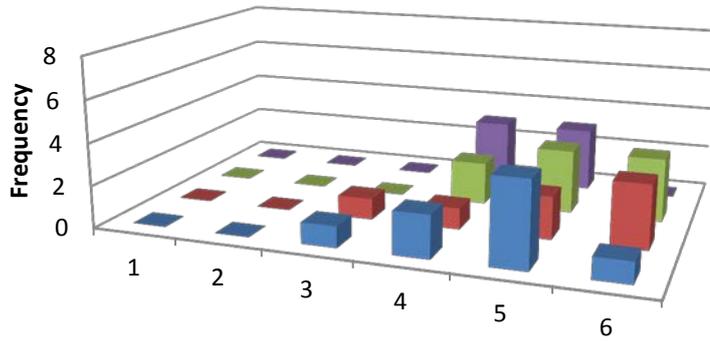

Did you get enough information before the course started?

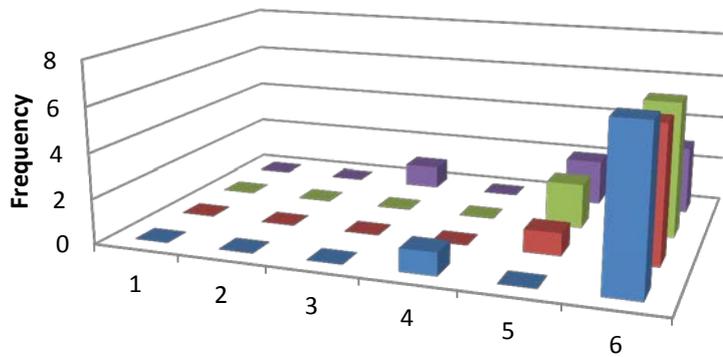

What expectations did you have and have they been satisfied

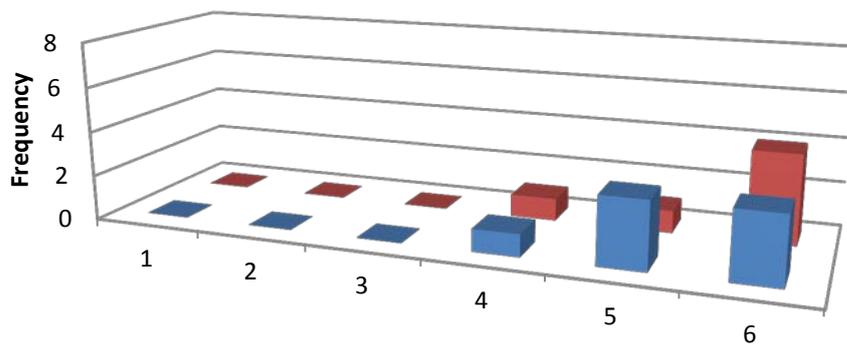

Please give an overall rating of the lectures given?

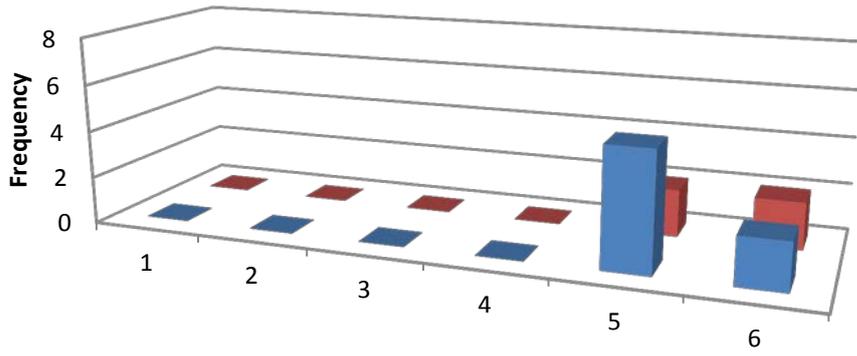

Rate your overall satisfaction with the practical part of the course

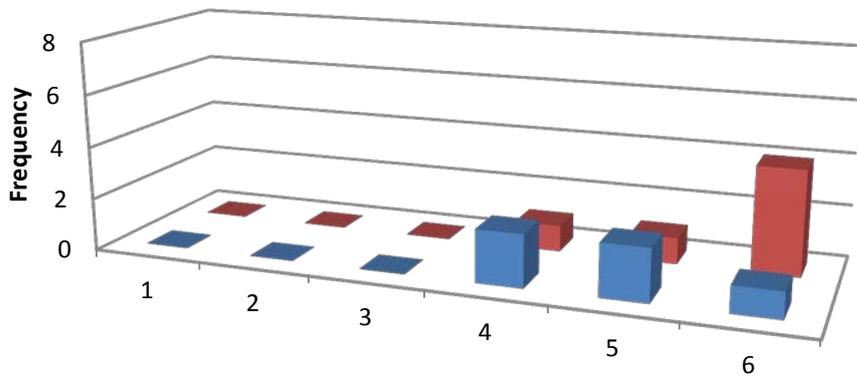

What do you think about the length of the course (5 days)

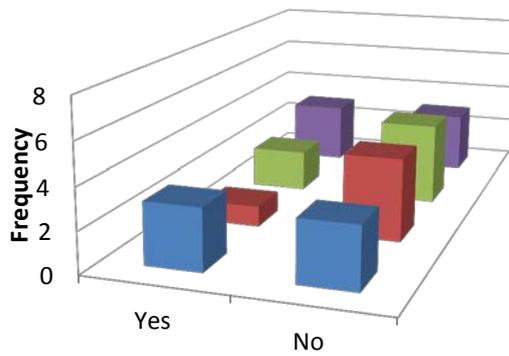

Do you think you will have use for the knowledge gained during the course?

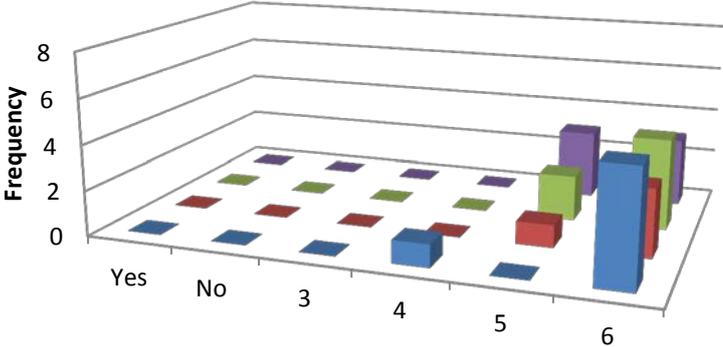

What do you think about the short literature review that is part of the course if you aim for 3 ECTS

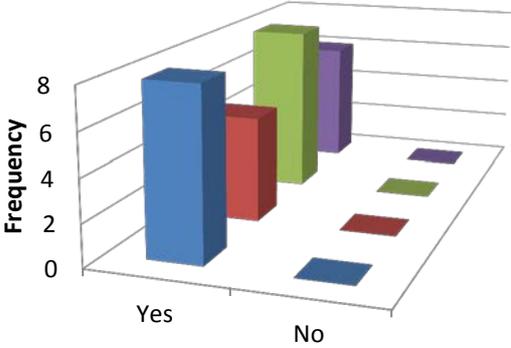

Was there something that we did not cover during the course that you had liked to hear about or practice

How would you rate this PhD course compared to other PhD courses you have taken?

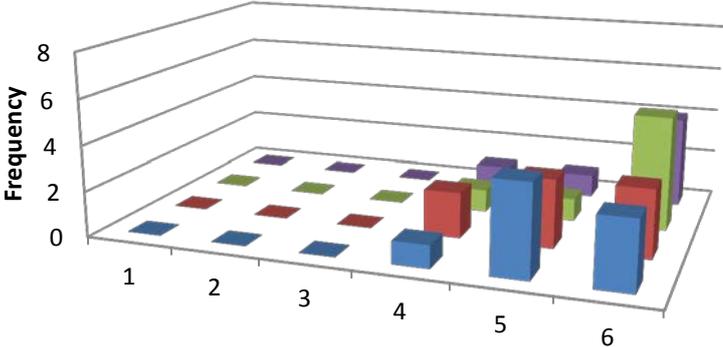

Would you recommend this course to your colleagues?

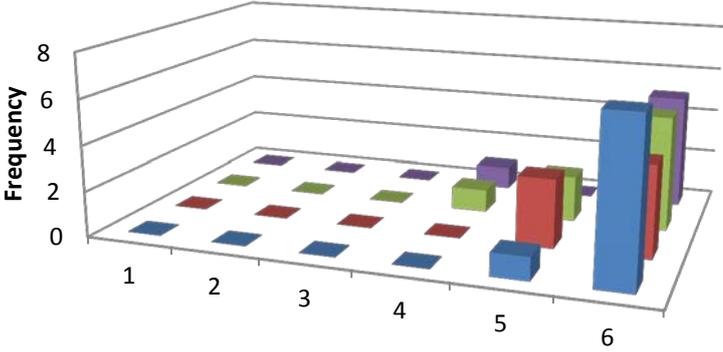

PRACTICAL PART

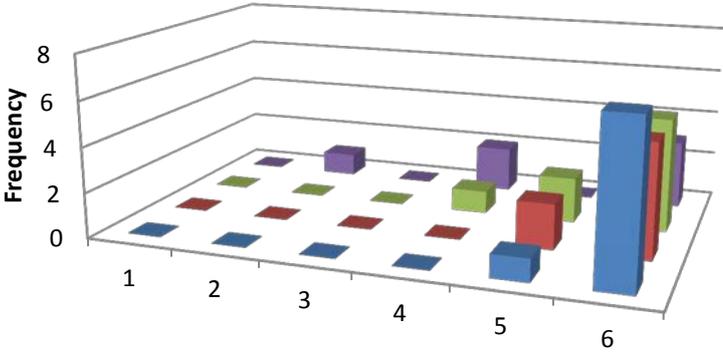

Please rate your satisfaction with the practical work on Monday afternoon:

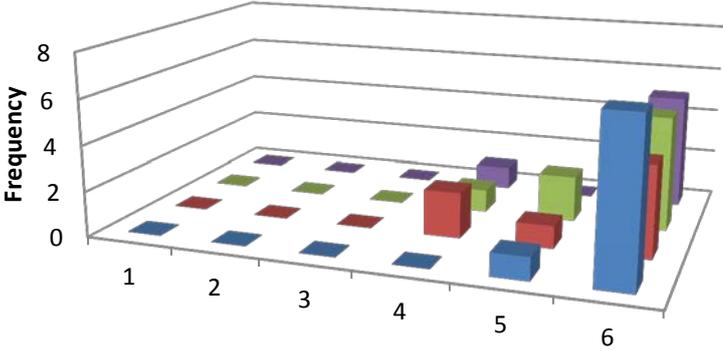

Please rate your satisfaction with the practical work on Tuesday afternoon:

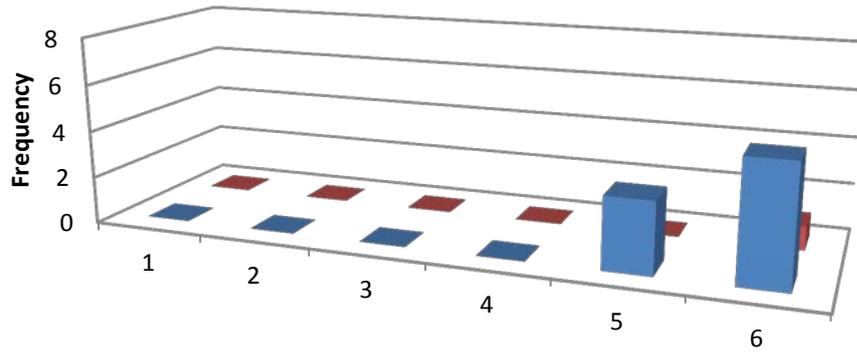

Please rate your satisfaction with the practical work on Wednesday afternoon:

Please rate your satisfaction with the practical work on Thursday afternoon:

Please rate your satisfaction with the practical work on Friday afternoon:
